- Memorized and performed a show in an agritainment setting
- Interacted with guests while staying in character in an interactive show
- Stayed calm in high-stress situations during lunch and dinner rush hours, managing a kitchen and making sure food went out in a timely fashion

Projects

Portfolio Website (HTML, Javascript, CSS, PHP, Linux, ApacheHTTP, Nginx Proxy Manager)

2025

- Learned how to use Nginx Proxy Manager to redirect GET requests to different ports on a secluded network, enabling multiple web apps over the internet
- Created a portfolio web page from scratch as well as a page to host Unity projects
- Bought and redirected a domain name to a web server through Cloudflare

Drop the Ball, Team Project (C#, Unity)

2025

- Primary developer on a team of three. Responsible for creating the environments and scene managers.
- Worked on level design and generated the concept for the game.
- Created pixel art for the game

Pointless Wars, Team Project (C#, Unity, Xcode)

2023

- Primary developer for a mobile/web Unity game. Created the concept for the game and developed the backend (the score system, scene managers, and enemy AI)
- The game was created my senior year of high school and won 3rd place in states and qualified for nationals.

Activities

Association of Computing Machinery: Treasurer

Theater Honorary: Business Manager

Grove City Improv Club: Technical Lead
